## RAPID SET® NON-SHRINK GROUT/CEMENT ALL™

All is so versatile it can be mixed from a no slump (very stiff consistency) to a high slump (very watery consistency). This ability to be able to mix one product to wide degrees of slump make it appropriate for virtually any application. Gaining outstanding strength, this product mixed watery will achieve 3,500psi in one hour and mixed stiff will achieve 6,500psi in one hour at 72°.

| 25#  | 91WRSG2 |
| 55#  | 91WRSG5 |

## RAPID SET® MORTAR MIX/ONE STEP STUCCO

Rapid Set® Mortar Mix/One step Stucco is Rapid Set® cement mixed with plaster and sand. This product can be applied as a one step stucco repair material and is used 1/8" or thicker, replacing the scratch and brown coat. It is capable of allowing the finish (color) coat to be applied in one hour. There is no lime added, no bonding agent needed and because it is non-shrink it will not crack or pull away from the existing stucco. It can also be used for large flat work areas, anchoring, and deep fills where small aggregate is needed. This mix will achieve 2,000psi in one hour at 72°.
