LED-LENSER TURBO TORCHES

Two German optoelectric engineers, Rainer and Harold Opolka, first designed these revolutionary NEW lighting instruments in the late 1990's. Seven years and 14 patents later, LED-Lenser "Turbo Torches" are available for the consumer market from Coast. By employing State-of-the-art computer chip technology, these unique lighting instruments provide a higher level of energy efficiency and greater brightness than conventional lights.

VAUGHAN CALIFORNIA FRAMER

The Vaughan California Framer combines features of two of our most popular tools into a rugged, heavy construction hammer. The smoothly swept claws were borrowed from our "999" Rip Hammer, and the extra large striking face, hatchet eye and sturdy handle are a heritage of our Rigbuilder's Hatchet. The hatchet style handle is best grade, second growth hickory. To provide extra strength, the handle has a large cross section where it joins the fully polished head. Available with either smooth or milled face.

Head	Weight	Length	Code
