

CEDAR SHINGLES

Wood shingles have a special warmth and elegance and a classic architectural look that speaks of quality, taste, and timelessness. No other cladding offers nature's own formula for unrivaled, weather-defying protection and insulation that ensures that your investment will last and last. We stock Stave Lake #1 Blue Certi-Label™ shingles in both Western Red Cedar and Alaskan Yellow Cedar. All of our shingles are 100% heartwood, 100% clear, and 100% vertical grain. Beronio is proud to be an associate member of the Cedar Shake & Shingle Bureau and supports the bureau's dedication to rigorous quality control and technical support. Shingle selection, installation, finishing details, and other information is available at www.cedarbureau.org.

We inventory a wide array of shingles. The most popular is the standard, unseasoned KS 10 16" (Five-X) sidewall shingle, which has an A-grade face and butt. 16" Five-X shingles are 2/5 of an inch thick at the butt and are typically installed with 5" of wood exposed to weather. Where tight-fitting,

parallel joints between shingles are desired, our KS 14 Rebutted and Rejointed shingles are an ideal choice. All sides and ends of R&R shingles are machine trimmed to have parallel edges that meet at 90 degrees. The faces have been sanded smooth, providing an ideal surface for finishing. Five-X R&R's are available in both Red Cedar and Alaskan Yellow Cedar for those who prefer a lighter colored shingle. We also stock 18" perfections for those jobs where a larger scale is preferred.

We stock Fanci-Butt red cedar shingles in all of the popular designs. Whether you're looking for Fishscale, Round, Diagonal, Arrow, Diamond, Half-Cove, Hexagonal, Octagonal, or Square, we have the profile in stock that makes your project unique.
