

J58 Douglas Firs 2x6 Select Struct Sanded TG

We took our nicest 2x6 Dry Select Structural Douglas Fir and ran it to a T&G "V" profile. The wood is characterized by small tight knots and good overall appearance. We, then, went to the extra step of having the face sanded. The result is some of the nicest "knotty" roof decking we ever seen.

Flooring BB2 Berg & Berg Lapland Smoked Oak

From their factory in Sweden, Ulf Palmberg and Jan Soderberg continue to painstakingly make some of the most beautiful floors in the world. The latest addition is Lapland Oak which features a "fumed" Oak wear layer with the color penetrating deep into the wood. The result is a natural look that cannot be duplicated by stain.

CertainTeed Fiber Cement Siding

CertainTeed Weather Boards set the standard for fiber cement siding. Fiber Tect® Sealing System ensures better moisture resistance. The siding carries a 50-year limited transferable warranty and a unique 2-year SureStart™ warranty where 100% of materials and labor are covered during the SureStart period.* CertainTeed is also environmentally friendly containing 50% recycled material. Nearly 100,000 tons of fly ash is diverted from landfills each year.

Smart-Bit® Pro Plug™ System

Never before have all the steps in plugging been put together in a single system that delivers a perfect result plug after plug. All the Pro Plug components have been specially engineered to work together cutting installation time in half. So, if you've always valued the strength of top down fastening and the high finish look of plugs but couldn't invest in the extra time and labor, put the Smart Bit Pro Plug system to work today. It is also ideal for flooring, rainscreen siding and cabinet work.

DP 26 Port Orford D Clear Decking

The uses of this unique, Northwest wood have included arrow shafts, battery separators, stadium seats, docks, yacht construction and exterior glue laminated beams. It also makes great, naturally durable decking where its smooth texture helps eliminate concerns about grain raise and splinters. This run of dry D appearance provides one clear-type face. Defects are limited to the odd knot on the face and occasional wane on the back side.
