## **RCH26**

### **2x6 S/Dry Redwood Deck Heart**

The RIS (Redwood Inspection Service) Standard Specification for Grades of California Lumber (1997) describe it as “a grade of redwood suited for exterior walking surfaces such as decks where specific design values are required in combination with an attractive appearance.” It is a second growth, mixed grain wood with small-to medium sized knots. Deck Heart is cut from the naturally durable red heartwood from which redwood gets both its name and reputation for durability. We are proud to offer wood sourced from the Humboldt Redwood Company – a leader in the sustainable forestry practices.

**PROS:** Good availability on all lengths, dry wood, easy to finish, inexpensive, locally harvested.

**CONS:** Some face and end checking. Allows knots.

## **CAH26**

### **2x6 Dry Clear Heart MG Redwood**

Clear All Heart is a grade of exceptional quality. The wood has a uniformly high appearance. The lumber is cut from the red heartwood for maximum durability. It's sold on a random length basis.

**PROS:** Uniform appearance, durable, clear, dry, easy to finish, locally harvested.

**CONS:** Expensive, limited availability of lengths, FG subject to face checking.

## **RAY26P**

### **2x6 S/Dry Redwood Clear A (Sapwood) Pre Oiled S4S**

Clear “A” is a value priced choice for clear decking. Clear contains both red heartwood and white sapwood and is suggested only for above ground use. All our stock is pre-oiled on all 6 sides with Armstrong Clark Natural Tone finish. This unique two stage, low VOC penetrating oil highlights the wood’s natural color, provides good initial protection, and is an ideal 1st coat for future finishes.

**PROS:** Value priced, good length availability, dry, prefinished, locally harvested.

**CONS:** White sapwood does not have the rot resistance of the red heartwood. FG so some face checking.
