

TURNCRAFT

COLONIAL WOOD COLUMNS

Turncraft Colonial round columns may be ordered with or without fluting in standard shaft diameters and lengths from 6" x 6' to 24" x 24', and in custom shaft diameters up to 30" and lengths to 30'. They are available in tapered and non-tapered versions and in a wide variety of plan styles. Square Columns are also available in smooth or fluted designs.

TURNCRAFT

ARCHITECTURAL COLUMNS

So many architects and builders select Turncraft Architectural Columns because they feature thoughtful product design, fine workmanship, superior assembly, precision turning and fluting, and artful finishing.

Round columns may be ordered with true architectural entasis in sizes consistent with the classic proportions of the Greek Doric, Tuscan, Roman Doric, Ionic, and Corinthian Orders, or in custom shaft diameters up to 36" and lengths of 30'. They can be smooth surfaced or given dramatic deep fluting (with increased stave thickness) as desired. Greek Doric Columns feature classic edge-to-edge fluting. Square columns and pilasters may be ordered to match (available in tapered or non-tapered, and in various plan styles).

Stain-grade interior columns are fashioned primarily from solid-stave Red Oak, Poplar, Hard Maple, Pine, Cherry, Redwood, Mahogany and Black Walnut lumber, and feature matching wood Caps and Bases.
