

Red Cedar

KC26 2x6 Red Cedar Elite Knotty Decking S4S
"Elite" Knotty is the nicest tight knot Western Red Cedar we've ever seen. This fine textured coastal stock features tight inter-grown knots, rich brown color, smooth milling, and is dressed at a full size of 1-9/16' X 5-1/2" The stock is well dried, naturally durable, very stable, and takes and hold finishes much better than hardwoods. In short, it is a natural choice for decking.

Decking

Developed in Norway, Kebony® is an environmentally friendly patented process which enhances the properties of sustainable softwood with a bio-based liquid. The process permanently modifies the individual cell walls to give the wood the characteristics of premium hardwood as well as a rich brown color. (After exposure to sun and rain the wood will develop a natural silver patina, or the brown color can be maintained with the regular application of pigmented UV sealers.) Kebony Radiata Pine is rot resistant carrying a 30 year warranty against decay. The added dimensional stability of Kebony opens this wood up to demanding uses from decks and docks to siding. It carries an FSC rating of 70% mixed sources.
